STATEMENT OF NEED

The City of Las Vegas is one of the fastest growing communities in the country and most of this growth has occurred in the northwest sector of the City. In 2004 it was projected that the future land use designated as Single Family Residential would increase by 30%. It is projected that the population will grow to an estimated 615,000 by the year 2010 and this tremendous growth is expected to continue for several more years.

As the City of Las Vegas continues to grow, increased demands will be placed upon the City to provide fire response and emergency medical services for existing and future residents.

It is imperative for the City of Las Vegas to plan, acquire and develop emergency services facilities in a timely manner, to ensure that these services will be available when needed. Due to revenue reform at the state and federal levels and the budget constraints of a growing community, the City finds it necessary to minimize the cost of its fire services site acquisition.

It is intended that this project will provide a location where fire/emergency services personnel and equipment will be housed and stored. The facility will include living and sleeping areas, equipment and vehicle storage areas and parking. It will provide much needed emergency medical response and fire prevention/abatement services.

FUNDING

It is anticipated the City of Las Vegas will provide for the construction of the facilities with general funds, fire services funds, fire services bonds, Residential Construction Impact Fees and developer contribution in lieu of fees.

MAINTENANCE

The City of Las Vegas agrees to maintain the Fire Services site in a satisfactory manner during all phases of development. Funding for maintenance and custodial services shall become a part of the annual operating budgets.

MANAGEMENT PLAN

The City of Las Vegas Agrees to the following commitments which will be incorporated by reference in the conveyance of the subject land:

1. To maintain the lands open without discrimination or favor.
2. To make no more than a reasonable charge for the use of facilities on the land (whether by concession or otherwise). The City Council will submit to the Bureau of Land Management a schedule of charges. All charges shall be subject to review for conformance with this requirement and appropriate modifications by the Secretary of the Interior or his delegate after reasonable notice and opportunity for hearing.
3. To develop and manage the land in accordance with the approved program of utilization submitted with this application.
4. To secure the approval of the Secretary of the Interior or his delegate on all plans of construction prior to commencing actual construction.
5. To maintain in satisfactory condition the facilities on this land.
